

PREPARING FOR COLLEGE

DORMITORY GUIDELINES

Dormitory rooms are furnished by the college so that each has a bed, a closet for hanging clothes, and some shelf and drawer space in a dresser. Each room also has a desk and chair for each student.

Students are allowed to have a storage unit no larger than a standard two-drawer file cabinet.

Students may not bring into the rooms additional furniture such as, but not limited to floor lamps, pole lamps, room partitions, chairs, sofas, or desks.

No furniture in the room may be moved, nor may any be added without the approval of the dormitory supervisor.

Any extension cord used in the dormitories must have a circuit breaker built in the extension cord.

Students are not allowed to have refrigerators in the dorms.

Nothing may be attached to the dormitory wall using nails, screws, tacks, glue, tape, or staples. The only approved method for attaching things to the dormitory walls is "plastic tack." Monetary fees for wall damage will be assessed based on the extent of the damage.

Dirty clothes must be kept in a sealed container. There must be no holes.

Televisions are not permitted in the dormitories.
